

I have worked in the record industry for the last 30 years. I am opposed to allowing more radio and TV stations to be owned by fewer companies. I would like to return to ownership limited to 7 AM's, 7 FM's and 7 TV's but I know that is not going to happen. There is too much power being place in too few hands at radio. As a life long business partner to radio, I can tell you first hand that this has not worked in favor of radio or the general public. There is little creative radio left in America. The only place this has been successful is in the corporate offices of broadcasting companies across Amercia.
